A WINTER ANNIVERSARY, PARADISKI CELEBRATES 10 YEARS

Ten years ago, on the 20th December 2003, skiers embarked for the first time on the Vanoise Express (*the world's biggest cable car*) to discover the 425km of pistes in the PARADISKI ski domain, linking the resorts of Les Arcs/Peisey-Vallandry and la Plagne (*Savoie-France*). The second biggest ski domain in the world, PARADISKI is part of a group of very large interconnected domains.

To celebrate this anniversary, PARADISKI has asked the haute-couture designer, Jean-Charles de Castelbajac, to decorate its Vanoise Express cable car. The world-renowned artist and innovator will cover the two double-decker Vanoise Express cable cars in a unique creation which will feature throughout winter 2013/2014.

This year PARADISKI is creating an event on the 16th December 2013 featuring PARADISKI GRAVITY. This will mark a world first in «highline» (*high altitude slack line*). The slack line will be strung between two cable cars 380m high. Two of the world's best 'high liners', Julien Millot and Tancrede Melet will negotiate their way along the rope, which will be suspended over the valley between the two cable cars of the Vanoise Express, defying gravity against an awesome backdrop!

VANOISE EXPRESS, THE BIGGEST CABLE CAR IN THE WORLD

The Vanoise Express cable car is at the heart of the Paradiski ski domain. It links the key resorts of Les Arcs/Peisey-Vallandry and la Plagne taking you from one station to the other in just four minutes at a speed of 45km/h; 12.5 metres per second; smoothly (*there are no pylons*) covering a distance of 1,824 metres in comfort and absolute silence. The crossing drops 380 metres between stations since Peisey sits at an altitude of 1612 metres whilst Coches is at a lower 1548m. The panoramic cabins have two floors suspended above the picturesque Ponthurin valley and offer

the unique panorama of Mont Blanc, the Swiss and Italian Alps and the Beaufortain massif. Built by POMA, the Vanoise Express is an ultra modern cable car and is one of a kind in respect of its size, technology and in particular the fact that it comprises two, separate engines on two separate cables allowing the cable cars to operate independently of one another. Every cabin holds 200 people and there's little risk of a long wait either: these cable cars can turnover 4000 people per hour.

THE VANOISE EXPRESS IN NUMBERS:

Length: 1824 m - **Drop:** 63 m

Cabin Capacity: 200 passengers over 2 floors with 1 conductor
(80 people on the top level and 120 people at ground level)

Speed: 12.5 m/s or 45 km/h

Height at the deepest part of the valley: 380 m

Two stations: Montchavin-Les Coches and Plan-Peisey

Construction company: POMA (www.poma.net)

Cost of construction works in 2003: €15 million

JEAN-CHARLES DE CASTELBAJAC CELEBRATES 10 YEARS OF PARADISKI

As part of its Birthday celebrations, Paradiski has entrusted the creative Jean-Charles de Castelbajac with the awesome task of decorating the two panoramic, double storey cable cars of the Vanoise Express. It was without hesitation that the famous haute-couture designer and artist, known the world over, accepted the task of creating a unique design to adorn the biggest cable car in the world. The result of Jean-Charles de Castelbajac's work for Paradiski will be unveiled on the 17th October 2013 at Paradiski's Birthday party at the Musee Grevin, Paris.

From the 21st December 2013 and throughout this winter, thousands of Vanoise Express passengers will see the unique design cloaking the cable cars in celebration of its 10 years thanks to the French artist Jean-Charles de Castelbajac.

Jean-Charles de Castelbajac

"Jean-Charles de Castelbajac is one of the symbolic creators of our time, known as much for his creations as for this complete and multi-faceted work of art, established for decades to come. His thinking generates a thousand concepts in a thousand directions, giving rise to a sound, a collaboration, a "mise-en-scene", a drawing.

A complex artist who is not solely defined by the restrictive field of fashion. He joins, assembles, diverts, adapts, quotes, parodies and represents all that is cinematic, artistic, television, comedic image construction, fashion and more"
